Education

University of Michigan, College of Engineering — Ann Arbor, MI

Bachelor of Science in Engineering, Computer Science | Minor: Statistics — *Expected May 2028*

- GPA: 3.74
- Honors: UM Club of Houston Scholarship, Dean's Honor List, University Honors
- Relevant Coursework: Data Structures & Algorithms, Computer Networks, Computer Security, Web Systems, Statistical Computing, Discrete Math, Computer Organization

Experience

Software Engineer Intern — May 2026 – Present

Daikin — *Waller, TX*

- Developed a TypeScript-based API test automation framework covering 5 REST endpoints and 100+ request/response validation scenarios, reducing regression testing time by 94% (30 minutes to 1.8 minutes)
- Integrated automated test results with an internal reporting dashboard by mapping test executions to API endpoints and leveraging Allure reporting, improving visibility into system behavior and failure diagnosis
- Designed scalable test infrastructure for validating complex API request and response combinations, increasing automated test coverage across critical thermostat control services

Projects

Fruit Nutrition App | *Python, TensorFlow, React Native, Expo, JavaScript, REST APIs*

- Developed a fruit image classification model using TensorFlow and convolutional neural networks (CNNs) to automatically identify fruits from user-submitted images
- Built a cross-platform mobile application using React Native and Expo that integrated machine learning predictions with nutrition APIs to provide real-time nutritional information
- Implemented an end-to-end image recognition workflow connecting image processing, model inference, and API-driven nutrition services to create a seamless user experience

LCDC Infrastructure Records Pipeline | *Python, React, JavaScript, Vite, HTML/CSS, Regex*

- Developed a Python data-processing pipeline that automated the conversion of raw drainage records into structured mapping data, reducing manual processing time by 91%
- Built a React web application for automated data transformation and validation, improving data accuracy and enabling efficient management of county drainage records
- Collaborated directly with government stakeholders to gather requirements and deliver a production-ready solution adopted by 3–4 additional county offices

Leadership & Involvement

Event Logistics & Organizations Committee Member — Jan. 2026 – Present

Girls in Electrical Engineering and Computer Science (GEECS) — *Ann Arbor, MI*

- Coordinated logistics and member communications for GEECS professional, social, and mentorship events, supporting engagement across a 60+ member mentorship program
- Collaborated with student leaders to organize networking and professional development initiatives that fostered community among women and gender minorities in computing

Technical Skills

Languages: Python, TypeScript, Java, C/C++, JavaScript, SQL, HTML/CSS, R
Frameworks & Libraries: React, React Native, Flask, TensorFlow, NumPy, Pandas
Tools & Technologies: Git, Docker, REST APIs, Allure, Vite, Linux/Unix, VS Code, Postman
